

## Anti-Corruption Task Force Reveals Their Deadliest Weapon Against Corrupt Politicians: THE OOOPSIE DOOPSIE!

There is one certain fact on this Earth: Criminals are not that smart, and they are not that clever.

Corrupt Senators, criminally bad lobbyists and sociopathic campaign billionaires can always be counted on to do one thing, every single time: Screw Up.

To be an executive crook, you have to fight, every second, of every day, to keep your cover up.

Normal people don't think twice about saying that they are going to go see their friend, Bob, at the Baseball game. Senator Feinstein can never, in her whole life, say that she met with a guy named Abramoff in the box seats at the baseball game. If that, theoretical, meeting had ever taken place, she could be looking at jail time.

To stay Teflon-like, corrupt 1%-ers need to live their cover story every moment. While 5% of the people around them are junior criminal "yes men", who assist them in their crimes, 95% of the people they deal with, daily, are normal people acting normal. It is all too compelling to fall into the trap of "normalcy", drop your guard, and slip up.

The longer it is from the day the crime was committed, the more likely it is for the corrupt Senator to lose their edge, let something slip, get lazy and blow the whole scheme wide open.

It can happen at a DC party. The booze flows like a rainstorm for the high and mighty, at Washington parties. Lobbyists choose certain tequilas, whiskey's and other manipulation beverages because they make it easy to separate the rich from their money. You can get more money, and more sex, at a Washington party, than anywhere else, because the whole thing is staged to weaken your ability to say no. So you have this mix of corrupt, and semi-corrupt, super powerful at this party, the clock is inching closer to 10PM, the "hit point". 10PM is called the "hit point" because it is the latest hour, with the most drunken guests, who have yet to leave to send the babysitter home.

In addition to the lobbyists who are converging around the culled out packs of suckers in the herd, another group is staking out turf: The reporters and tipsters. Now is, also, the exact moment that they can get the drunk and stupid to say something revealing.

Is that Senator Reid over their talking to Barbara Boxer? A woman with her back to the group leans slightly to one side as Harry Reid says, in an alcohol amplified volume,: *" ..ahhh, screw 'em, at least they only took out my eye but they didn't take all that Solyndra cash out of my bank account..HA.. They ain't never gonna figure out about my Goldman 327 account..."*

The woman with her back to the group sidles away as if to say hi to a comrade. Too bad Harry, that was Carol Leonning that heard that. She is the top corruption-busting reporter from the Washington Post: **OOOPSIE DOOPSIE!**

## **Ooopsie Doopsie's are not always so in-your-lap.**

The key to the operation of the **OOOPSIE DOOPSIE** is patience. You just have to watch and wait for them to slip up and you have to know what to look for.

*"Luck is when preparation meets with opportunity";* this, oft quoted, saying describes the whole process.

You have to watch SEC S-1 filings, financial reports, HR newsletters about who got fired, who got hired and who sued who. These sorts of things will give you clues about their slip-ups.

The FBI recently caught Whitey Bulger after setting up an EPIC Ooopsie Doopsie net. Finally, the old White-ster flinched and they got him.

If YOU know your guy is dirty, then you need allies. Look for every reporter on Earth who has published similar stories and similar crimes or other people with your targets circle of contacts. Pull those reporters into your team.

The bad guys always shoot themselves in their own feet. Watch, wait, observe and they will deliver themselves right to your trap.

Then, you simply write it all up and deliver the facts to every reporter and law enforcement agency you have ever heard of. You never work with a single agency or reporter, they will be compromised and probably leveraged to run a cover up. Get the news to EVERYBODY.

The Ooopsie Doopsie tactic works every single time!

---

THE TASKFORCE: The Most Potent Public Service Group on Earth

By Deanna Conners

It is a really, really bad idea to do political corruption.

It is a worse idea to do political corruption, with tax money from these particular members of the public.

It is the worst possible idea, in history, if you do political corruption, with the tax money from these members of the public, and then use their own tax dollars to put their companies out of business, copy their products and make billions of dollars, off of their blood and sweat.

Are politicians, and their campaign financiers, that evil? Yep!

So this has happened to a bunch of different Americans. But, some of these American's can be clever people. That can be darn right creative in their problem solving.

So, it turns out: Crooked politicians, and dirty financiers, are not very smart beyond their spreadsheets. They steal quite a lot of the things that they make money off of, because they do not know how to create.

When, some of them, stole with great audacity; they poked the sleeping bear and kicked the hornet's nest, at exactly the same time.

It is hard, on the public, when you steal their futures, their dreams and their homes. It gets them kind of upset. (IE: Congress's lowest-in-history approval numbers)

So, some people, that had these bad things done to them, got together and, not only, said "enough is enough"; they also built and deployed the tool to put an end to it.

That tool is called: THE TASKFORCE!

Although it is not openly admitted, they took out Solyndra, Eric Holder, Steven Chu, A123, a massive chunk of the senior White House staff, Erick Strickland, Lois Lerner, and quite a number of very famous names that you have heard of. They made these people resign, get fired or get defunded. They made some of them get indicted.

They brought the FBI, The GAO, Attorney Generals from across America, and tens of thousands of journalists into ongoing investigations against Google, Kleiner Perkins, Elon Musk, and gobs of suspects. Think about it! You never saw so many resignations, at about the same time, of some of the most powerful people in politics, who all happened to be financially connected. Hmmmmm?

The Taskforce showed hundreds of thousands, of members of the public, how to do, almost, the same level of investigations, on dirty politicians, and their cohorts, as the FBI.

Not only do they accomplish their magic without breaking a single law, the law enforcement agencies are obligated to help them do it.

They have one requirement: The bad guys actually have to be doing crimes. The Taskforce will not go after anybody because of race, appearance, accent or poor social skills. If you have the Taskforce on your tail, it is 99% certain that you did crimes!

They work as a team and retain the services of former FBI, CIA, DIA, DEA, Federal prosecutors, independent media publishers, university researchers, private investigators, and have quite a volunteer squad, comprised of the general public.

The opposition does not even need to spy on them because they openly disclose their plans online, and send regular reports in to law enforcement agencies.

How do you take down a billion dollar Criminal Corporation, a dirty Senator with vast amounts of cash hidden in Switzerland, or a cartel of insane technology financiers? Simple. **You use the truth!**

Crooks do their work in the dark. The Taskforce brings the brightest lights on the planet to the blackest holes in Washington, DC and Silicon Valley.

Every single manipulation of financial records can now be traced. You can monitor their activities from their UBER app and their social media postings. Every illegal sexual transaction can now be discovered. Every overseas hidden tax hole have can be found out and reported. All of the under the table pay-outs are now open. The payola using stock can be found out. Secret PAC's are no

longer secret. In other words, there are no longer any secrets in the world. Every dirty investor, and all of their stock portfolio assets can now be identified, tracked and terminated. All within the full confines of the law.

If, during the course of an investigation, you are missing the final links to a payola scheme review, just wait a minute, 4CHAN, or some whistle-blower, will post it on Facebook in a short amount of time. Snowden didn't create all of this transparency, but he did make a milestone happen. Wikileaks has now converted into a search engine for corruption. Over 1000 organized anti-corruption groups now exist AND THEY ALL WORK TOGETHER. Over 2000 internet companies will sell you a Senators entire, low-level, backgrounder for \$20 bucks. The Washington Post has an investigation database that makes X-Key-Score look like child's play...actually quite a number of digital news offices now do.

Catching the bad guys is a hundred times easier, now, than it was fifteen years ago.

Investigations, by the Taskforce, are FOR LIFE, or until the target is jailed. Some Taskforce targets are, in fact, now in jail. When members of the Taskforce retire, others take up where the last one's left off.

Of course, politicians and their billionaires are famously vindictive. When The Taskforce gets a retribution attack on them, they have a motto they invoke: "*Ten For One*". Whatever the politician does in retribution to these members of the public, that politician gets back ten times over. Additionally, every corrupt politico hit-job and dirty billionaire attack can now be tracked right back to the source. The more that politician attacks you, the more they draw a line of evidence right straight back to themselves.

The Taskforce has sponsored hundreds of journalists in the creation of their own on-line digital newspapers. This transition from print, to digital, has brought the news industry to its knees. In exchange for getting infrastructure set-ups, The Taskforce trades access with these new digital publishers.

The Taskforce offers rewards for tips and disclosures from past employees of the dirty corporations and past aides from the dirty senators. They pay up to tens of thousands of dollars for such tips.

Targeted criminal politicians and billionaires are very, very aloof and feel like they are made of Teflon...until the manila envelope full of facts or the FBI shows up on their front porch.

Don't you wish you could hire the Taskforce?

Here is the best part, you can do everything that they do, on your own. Modern private investigators have all of the same resources that the FBI and CIA have. For the same price as a marriage counselor, you can hire one of them to be your mini-Taskforce.

Limited on funds? Do-it-yourself. There are now Maker Faire-type groups, and meetings, that get people together and teach them how to do these things. You can find the links to these training groups by contacting the campaign manager of your local political party, the political reporters at your local independent news

outlets and by searching the term: “anti-corruption groups” in most search engines.

You will probably be up against a crooked billionaire. Should you be scared?

No, he should be scared. If he is dirty, he got his billions by doing criminal things. You now have the power to take it all away from him, cut off his sources and wipe out his portfolio. That dirty billionaire should be very, very worried about you and the 300+ million other taxpayers who might be put-off by his crimes.
