

There's a very good reason why they named it AMAZON!

[State of the Nation](#)

Just like Walmart was used to take over the American retail industry after it was incorporated in October of 1969, Amazon was actually established to completely dominate the Internet-based retail industry, which it has successfully done.

As of January 31, 2019, Walmart has 11,348 stores and clubs in 27 countries, operating under 55 different names.[1]

Not only did Walmart put hundreds of thousands of “mom and pops” out of business across America, the retail giant greatly diminished both access and choice for the shopper in the pre-Internet Age.

Amazon

Do you really think that the very name — **A M A Z O N** — wasn't chosen with purposeful design?

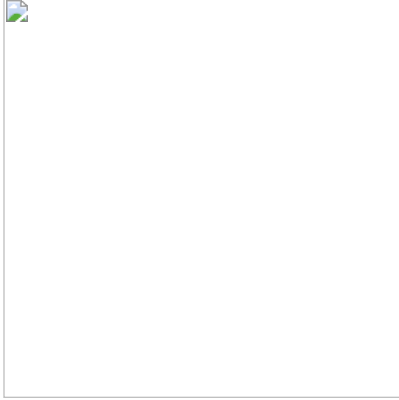

Not only is this joint C.I.A.-Corporate venture a stone-cold black operation, it's also a massive psyop that only gets bigger by the day.

How so?

Well, once again, the American retail sector has been collapsed with stores and malls closing around the country at breakneck speed.

Where Walmart effectively functioned as an F5 tornado for small rural communities everywhere, Amazon is rapidly morphing into a Cat 5 mega-hurricane—NATIONWIDE.

Amazon went from a company that did not make a cent for many years and literally operated at a loss, to becoming [*“the most valuable public company in the world after passing Microsoft”*](#) in 2019.

In point of fact, the Amazon River is the longest river in the world as well as the largest by discharge volume of water. Its tributary system of rivers and streams and rivulets is the most complex and convoluted on the planet. It's pervasive and profound impacts on South America is greater than any of the other major rivers on any other continent.

Not only that, but Amazon's business model was set up and structured from the get-go as an octopus innervating and interpenetrating every segment of the corporate sector. This is how Amazon is being used to monitor and control much of *Corporate America*. Just like the gargantuan Amazon River snakes through the northern half of South America as its numerous tributaries profoundly affect everything in their path, the enormous Amazon.com platform exerts influence far beyond Internet commerce.

The bottom line here is that Amazon can act like the 800-pound gorilla, ***who sits anywhere it wants to***, because it was made that way. Just watch the drama being acted out in New York City with the withdrawal of Amazon's proposition to set up shop there. What a complete joke... on everyone except *Deep State*.

Kabuki theater

The hidden back story to that AOC debacle in NYC is that it's all *Kabuki theater* being deliberately staged so that every community in United States is aware that Amazon is very serious ... and not to be messed with...by anyone. They will always get what they want because it's a full-blown government-corporate operation.

Now see stage right and the melodramatic Jeff Bezos–Lauren Sanchez “Peyton Place” being staged with maximum effect. In this case, the wife is the real covert CIA operative who everyone is missing. Not only was she the real brains behind Amazon, she's also the handler—Bezos' handler. See exactly how this is done at the link below.

[PEDOGATE: Women Operatives In Very High Places](#)

Anyone who thinks that MacKenzie S. Bezos is just an innocent girl being pushed out of her marriage to billionaire Bezos ought to consider the true MO behind every major start-up that is born in a DARPA lab.

By the way, how does a guy like Jeff Bezos come to own the primary organ of the CIA's *Mockingbird Media* except by purposeful design—EXTREMELY PURPOSEFUL?!

Likewise, how does Amazon come to take over the cloud computing market in a day and a night? Talk about a major *Big Brother* move to lock down the cloud space! Now Amazon is going after logistics: [Amazon took over the \\$176 billion market for cloud computing. Now it's using the same playbook in logistics.](#)

All of these enormous moves throughout *Corporate America* reflect the covert scheme to significantly concentrate corporate power and influence in the hands of just a few corporations as well as a few company CEOs /presidents / business magnates.

Even the main metrics gauging the success of the markets indicate that, in 2019, it all comes down to the AAAA — Amazon, Apple, Alphabet, AT&T — as well as Walmart, Microsoft, Facebook, Exxon Mobil, and a few other corporate behemoths that were also set up as government-corporate enterprises from the very beginning.

Command & Control

The real problem that emerges time and time again with all of these corporate monsters is that they eat everything in sight so that they can monopolistically control the marketplace—EVERY MARKETPLACE, either directly and/or indirectly.

However, it's the marketplace of ideas and innovation that really suffers at the hands of these CIA-controlled control freaks. Who does not see the draconian control that *Big Social Media* currently exerts on our freedom of speech? Both Facebook and Twitter shut down anyone's voice they care not to hear, as does the ever-censoring Google.

What follows is just one chilling example of the way that Amazon is being used to terminate any and all dissent in the USA against the detrimental and sometimes deadly super-vaccination agenda.

[Shifty Adam Schiff Threatening Outright Censorship, Pushes Amazon to Remove All Anti-Vaccine Content](#)

Now here are two other glaring examples of Amazon censorship that ought to concern every reader in America. And, this pattern is only getting more frequent and audacious by the month, just as Facebook and Twitter are recklessly terminating user accounts right and left for doing nothing but exercising free speech.

[Amazon Bans 'Holocaust Denial', shreds and incinerates thousands of books](#)

[How my book unmasking Bill Browder was censored by Amazon by Alex Krainer](#)

Not only are extremely important ideas eliminated with a single keystroke by the *Sultans of Silicon Valley*, so are people who oppose the *New World Order* agenda. As owner of The Washington Post, Bezos is notorious for taking down any enemy of *Deep State* in a D.C. moment. See: [C.I.A. Pawn Jeff Bezos Uses WashPo to Smear Political Opponents of Deep State](#)

How did Bezos even come to own the WAPO in the first place? The same way his grandfather was mysteriously made the President of Monsanto. [BLOCKBUSTER: Jeff Bezos' Grandfather Was President of Monsanto](#)

Everything points to the Bezos family as being one of those C.I.A. families that goes back generations. This is the type of family who will take orders from TPTB and unquestionably carry out those orders no matter what the consequences to people and planet. In and of themselves, they wield no real power, but are wittingly used as agents of *Deep State* and operatives of the U.S. Intelligence Community—24/7.

In this regard, Bezos is nothing but a C.I.A. contractor whose main job is to expand and solidify the reach of *The Company* (as the C.I.A. is known in intelligence circles) worldwide. Pretty soon Amazon will be as pervasive and powerful, internationally, as Walmart is and as Coca Cola once was on the ground.

KEY POINT: Very few really understand but the primary reason why the C.I.A. is called *The Company* is because they [COMPLETELY] control *Corporate America*. You can't even become a corporate CEO and/or President without being a card-carrying CIA agent or contractor. The Fortune 1000 companies are populated with so many CIA spooks in top management that they can be counted on to carry out the CIA's multifarious covert agenda(s), both domestically and internationally.

The very nature of the publicly held or publicly traded corporation is such that as soon as it goes public and shares can be traded, the influence of its original owners and founders and officers is immediately diluted to the extent that it is owned by outside CIA-chosen shareholders. Whenever the C.I.A. wants to take over any particular corporation, they merely buy their stock, bonds and every other publicly traded security. Then they dictate who the Board of Directors will be, who then approve the carefully selected and compromised top management and their compensation packages.

Intelligence

There has been no greater **public** collaboration between the Central Intelligence Agency and a US-based corporation than that of Amazon and the C.I.A.

The number of HUGE joint projects that have been made public is both unprecedented and alarming. That the world's largest online retailer would be so closely associated with the C.I.A. is a reflection that *Deep State* really doesn't care what the American people think anymore. They don't even care if citizens are asking: [Is Amazon Echo a CIA listening device?](#)

What makes this quickly evolving partnership so dangerous and distressing is that there is a fake shine put on these state-corporate entities that so many wants to be a part of. In this way, people are in awe of these corporate Frankenteins, instead of being extremely wary of them.

Which begs the question: [Just how much has the CIA collaborated with AMAZON to change American intelligence gathering?](#)

Which demands further investigation into this inquiry: ["What's the CIA Doing on Amazon's Cloud?"](#). Surely, there are many more inquiries that need to be made post-haste into these various joint projects that will profoundly affect each and every one of us in the future.

What is beyond dispute is that the Amazon.com has morphed into one of the largest data-mining operations in world history. Some folks spend all day long there shopping and leaving comments and flipping from video to video, book to book and audio to audio. Each of these past-times creates more data that is undoubtedly captured and stored and analyzed in ways that only the C.I.A. can do.

What's of paramount importance to comprehend is that the CIA, NSA and DIA are at the hub of this global intelligence-gathering operation. Amazon, Google, Facebook, Twitter, Apple, Microsoft, Instagram, Snapchat, etc. are continuously feeding their stealthily collected data to the government, as well as to other buyers of the data who then use it in highly manipulative ways.

Wow—what a complex and convoluted scheme to strip the citizenry of their privacy, and yet how many folks know about the sheer depth and breadth of it?

Amazon censorship

With this critical understanding, Amazon was intentionally created to centralize much of the nation's retail buying and selling power in one company. The world-famous Amazon website is not only a one-stop shop for everything under the sun, it establishes a digital record of every buyer's purchases and other online habits. To say that a highly detailed social profile is also being established would be a gross understatement because a LOT more profiling is being accomplished with every visit to their site.

However, it's the raw state power to unlawfully censor that is of greatest concern to a free and open society. In this regard, when Amazon throws its weight around, *We the People* get crushed without recourse. And, the government will not so much as raise a finger in the defense of the First Amendment or any other lofty principle or God-given right. After all, Amazon is wholly owned and operated by the secret government entities that are virtually impossible to identify and, therefore, difficult to check.

This is the rubric under which the whole of American society is really governed and controlled; it's a fascist corporatocracy where the corporate sector is joined at the hip with the government...but no one really knows about the criminal collusion except a few power-players at the very top.

The cast of characters goes way beyond these main stars of "The Jeff Bezos Affair"

The Jeff Bezos Affair and Divorce

In light of these crucial revelations, how does one make sense of the most captivating soap opera in the history of Hollywood? Remember, the C.I.A and Hollywood have always been joined at the hip as well. They're experts at creating spectacles that distract and deceive, divert our attention and misdirect.

Even The New York Times has labelled the "Bezos affair and divorce" the biggest VIP melodrama ever to have entranced so many watchers around the world. Even the star of the show — Jeff

Bezos — seems to revel in his new roles as both screen star (smartphone) ... and lawyer. See: [What in the world is really going on with 'Jeff Bezos, Esq.?'](#)

Truly, this whole Bezos affair makes “DALLAS” look like the “FLYING NUN”. You really can’t make this stuff up; unless, of course it’s been scripted by Hollywood’s best and brightest CIA contractors, which it has.

However, there is a highly radioactive political back story here. That story concerns Donald Trump and Jeff Bezos, the C.I.A. and the Trump organization, The Washington Post and the National Enquirer. And, “Yes!”, it has a lot to do with the fact that [C.I.A. Pawn Jeff Bezos Uses WashPo to Smear Political Opponents of Deep State.](#)

But what’s the real back story here?

That will be covered in a future article because the vital point of this piece is much more essential to understand. In the meantime, there are many sordid details in the link below that will help the armchair sleuth to piece this intel puzzle together.

[HUGE Takedown of Jeff Bezos in Progress: Is the MANLY mistress part of the sting?](#)

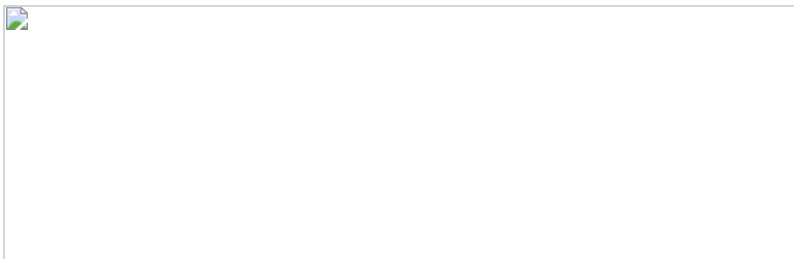

Conclusion

We’ve got some very serious problems with the way that Amazon has taken over so much of American society. What’s especially concerning is the way that the growing Bezos empire has arrogated so much power unto itself so quickly, particularly during the lawless Obama years.

When headlines read like this: [Trump Leak Now Points To Bezos’ Hidden \\$600M Deal With Obama CIA To Feed Washington Post](#), you know we’ve got BIG problems. That a retail website could develop so many corrupted and compromising inter-relationships throughout the intel community makes one wonder what *Deep State* has put into place over several decades way under the radar.

At the end of the day, Amazon is just one more fascist entity that will have to be decisively dealt with... before they deal US out of everything we hold sacred and important to the American way of life. Oh, and by the way, almost every employee of Amazon will tell you that working there is like working in the Third Reich, where the Bezos-directed “Gestapo” is running the show from behind.

Action Plan
