

Never, Ever, Get Your Internet From Outer Space!!

By Boeing Resources

A bunch of companies are about to offer you internet from satellites, balloons and things flying around above the Earth.

If you take any of these companies up on their offers, you are destroying yourself, your family, your privacy and your freedom.

Do you really think that any corporation is going to spend billions of dollars to give YOU free internet?

Seriously!? Have you ever heard of that happening in history...without an awful catch?

Every single time society hears about a free sucker-play from a corporation, years later we discover that we have been used by that corporation for some sinister purpose.

These politically motivated companies are doing this to control what you see, think and feel and to steer you to their political points of view.

Facebook's and Google's master plan is to have no employees and run their companies with Chat-Bots that are programmed to steer you to their ideologies. Yes! Facebook wants to get rid of all of their Pakistani and Indian programmer-slaves and put the whole thing on SkyNet mode. Documents just uncovered that showed that Facebook's robots had already run out-of-control by creating "their own language" to plot with each other.

Facebook is the Anthony Weiner of the Internet.

Just like Anthony Weiner, Facebook has a pretty facade which hangs around with Hillary Clinton.

Just like Anthony Weiner, Facebook is a DNC operative.

Just like Anthony Weiner, Facebook is ridden with sexual depravity.

Just like Anthony Weiner, Facebook is incapable of seeing how sick and it is.

Just like Anthony Weiner, Facebook has an autistic inability to recognize it's evil.

Just like Anthony Weiner, Facebook robotic-ally abuses and can't stop itself, even when caught in broad daylight.

Just like Anthony Weiner, Facebook sees the epic volumes of complaints, lawsuits and negative articles about itself but it cannot cease it's lumbering conveyor belt process of social perversion.

Facebook will never stop doing evil, manipulating news and politics and spying on the public. There was never a "stop" button built into Anthony Weiner's mind and there isn't a "stop" button built into Facebook's computers.

Facebook, Google and the Silicon Valley spies are putting these “internet satellites” up there.

Don't believe their lies about their encryption. They send your data to VERY fishy characters before it gets to you.

You are the biggest sucker on the planet if you use their internet.

Using satellite internet is like letting someone chew your food before you eat it. You don't want second-hand data, with all of the dessert scrapped off, and with a bugging device embedded in each bite!
