Here's the list of GMS apps that I mentioned at the end of the meeting in order to reduce the number of preloaded apps on the device.

I understand that Google wants to distribute its services on our products as much as possible and I will help as much as I can.

The fact is that the apps I have chosen below are all content players and can be downloaded easily in association with user's content selection via Play Store.

Please check this out and let me know at your earliest convenience if this can be done from **RE**

Preloaded (12): Search, Voice Search, Gmail, Youtube, Chrome, Maps, Play Store, Google+, Hangouts, Google Drive, Google Settings, Photo
Downloadable (5): Books, Games, Movies, Newsstand, Music

The goal is to reduce the number of preloaded apps dramatically (from 49 on **R** and 51 on

Note 3 to 40 on **RE** so that we don't clutter our products with apps that may not be necessary for the majority of users and we give them as much space as possible. This will also help us deal with complaints from governments, NGOs and end users.
